The image is a screenshot of the WinHex 20.0.0.0 application. The main window displays a hex editor for a file named 'pagefile.sys'. The file is located at 'C:\Work\Data files\Mod15\InMod1'. The interface is divided into several sections: a menu bar at the top, a toolbar, a main editing area with hex and ASCII columns, and a right-hand pane with file information and a data interpreter. The hex data shows a mix of zeros and some non-zero values, with the ASCII column displaying various characters and symbols. The status bar at the bottom indicates the current offset is 37D2 and the block size is 46 bytes. The system clock shows 11/22/2024 05:28:25.
